"Hello World" Program in Java and C

In Java:

```java
//-----------------------------------------------------------------
// Hello.java
//-----------------------------------------------------------------

public class Hello
{
   public static void main(String[] args)

   // Write "hello, world" to stdout.

   {
      System.out.println("hello, world");
   }
}
```

In C:

```c
/*---------------------------------------------------------------*/
/* hello.c                                                       */
/*---------------------------------------------------------------*/

#include <stdio.h>

int main(void)

/* Write "hello, world\n" to stdout.  Return 0 if successful. */

{
   printf("hello, world\n");
   return 0;
}
```
