

Grading Rubric: COS 318 Final Project

Fall 2015

This project is worth a total of **20 points**.

Please, make sure that your project compiles without errors or warnings.

DD: Design document. **5pts.**

PT: Provided test cases. The test script posted on Blackboard will be used to evaluate your implementation **10pts.**

YT: Your test cases. Please indicate the purposes and expected results. **2pts.**

TT: TA test cases. We will run our own test cases on your implementation. **3pts.**

Additionally, we reserve the right to **remove as much as 2 points** for submissions which are extremely confusing, obfuscated or overcomplicated. Please write simple, readable code with comments, but don't leave unnecessary debugging print statements in your code. Dont forget to attach a brief **README** in text format.

Recall that this class has a firm late submission policy, which is detailed on the COS 318 website.
