COS 125, SUMMER 2024

- ▶ *the power of technology*
- ▶ *course mechanics*
- ▶ *course resources*

COS 125 course objectives

Goal 1. Identify computational problems and the strategies used to solve them.

Goal 2. Reason about the steps required to solve such problems.

Goal 3. Write and debug code that implements the solution to computational problems.

topic	purpose
data types	store information
conditionals	control the flow of a program
loops	repetition
arrays	processing huge amounts of data
ethics	using our tools responsibly
input and output	text, graphics, sound
functions	building larger programs

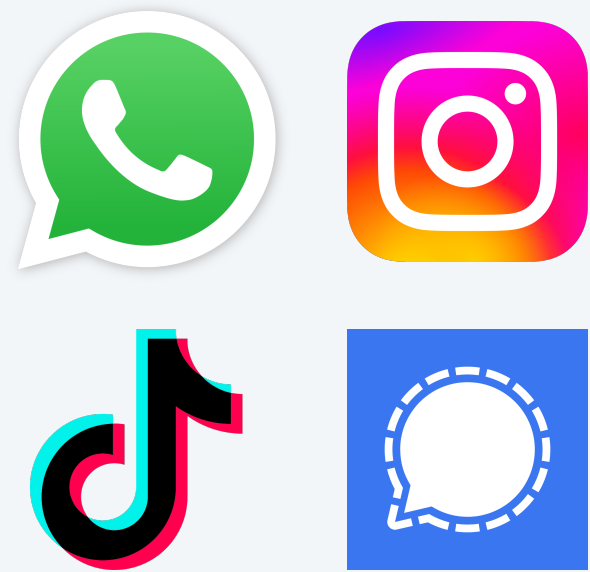

<https://introcs.cs.princeton.edu>

COS 125, SUMMER 2024

- ▶ *the power of technology*
- ▶ *course mechanics*
- ▶ *course resources*

Technology is transforming society

Example

What can we do with it?

Impact on society

- ▶ Stay connected
- ▶ Amplify voices
- ▶ Mobilize groups
- ▶ Distract
- ▶ Exposure to unattainable ideals

- ▶ Higher education at scale
- ▶ Lifelong learning
- ▶ Most of the offering is in English
- ▶ Retention rates can improve

coursera

Khan Academy

edX

Anatomy of a Java class

```
public class Point {
    private final double x; // x-coordinate
    private final double y; // y-coordinate

    // creates and initializes a point with given (x0, y0)
    public Point(double x0, double y0) {
        x = x0;
        y = y0;
    }

    // return the Euclidean distance between the two points
    public double distanceTo(Point other) {
        double dx = other.x - x;
        double dy = other.y - y;
        return Math.sqrt(dx*dx + dy*dy);
    }

    // return string representation of this point
    public String toString() {
        return "(" + x + ", " + y + ")";
    }

    public static void main(String[] args) {
        Point p = new Point(4.0, 4.0);
        Point q = new Point(8.0, 1.0);
        StdOut.println("p = " + p);
        StdOut.println("q = " + q);
        StdOut.println("distance = " + p.distanceTo(q));
    }
}
```

It called the two string of P And what did the two string of P do?

Technology is transforming society

Example

What can we do with it?

Alexa, please set a timer for 10 minutes.

Siri, what's the weather forecast for tomorrow?

Hey Google, please turn on the lights.

Impact on society

- ▶ Support a wider range of ways to interact with technology and information
- ▶ May have trouble with people who stutter or code-switch between languages

Can you please tell me your funniest joke?

Sure, here's a joke for you:
Why don't scientists trust atoms?
Because they make up everything!

- ▶ Increase efficiency
- ▶ Vertiginous change
- ▶ Bad jokes

COS 125, SUMMER 2024

- ▶ *the power of technology*
- ▶ **course mechanics**
- ▶ *course resources*

Course elements

	Objective	When	Where	Who
Lectures	Introduce new material	MW 1:30–2:50pm	McDonnell 105	Marcel or Sebastian

We encourage you to participate!

Marcel Dall'Agnol

Sebastian Caldas

Course elements

	Objective	When	Where	Who
Lectures	Introduce new material	MW 1:30–2:50pm	McDonnell 105	Marcel or Sebastian
Precepts	Active learning, discussions, problem solving	TTh 1:30–2:50pm	McDonnell 105	Marcel or Sebastian

This is a supportive environment to ask questions
and make mistakes

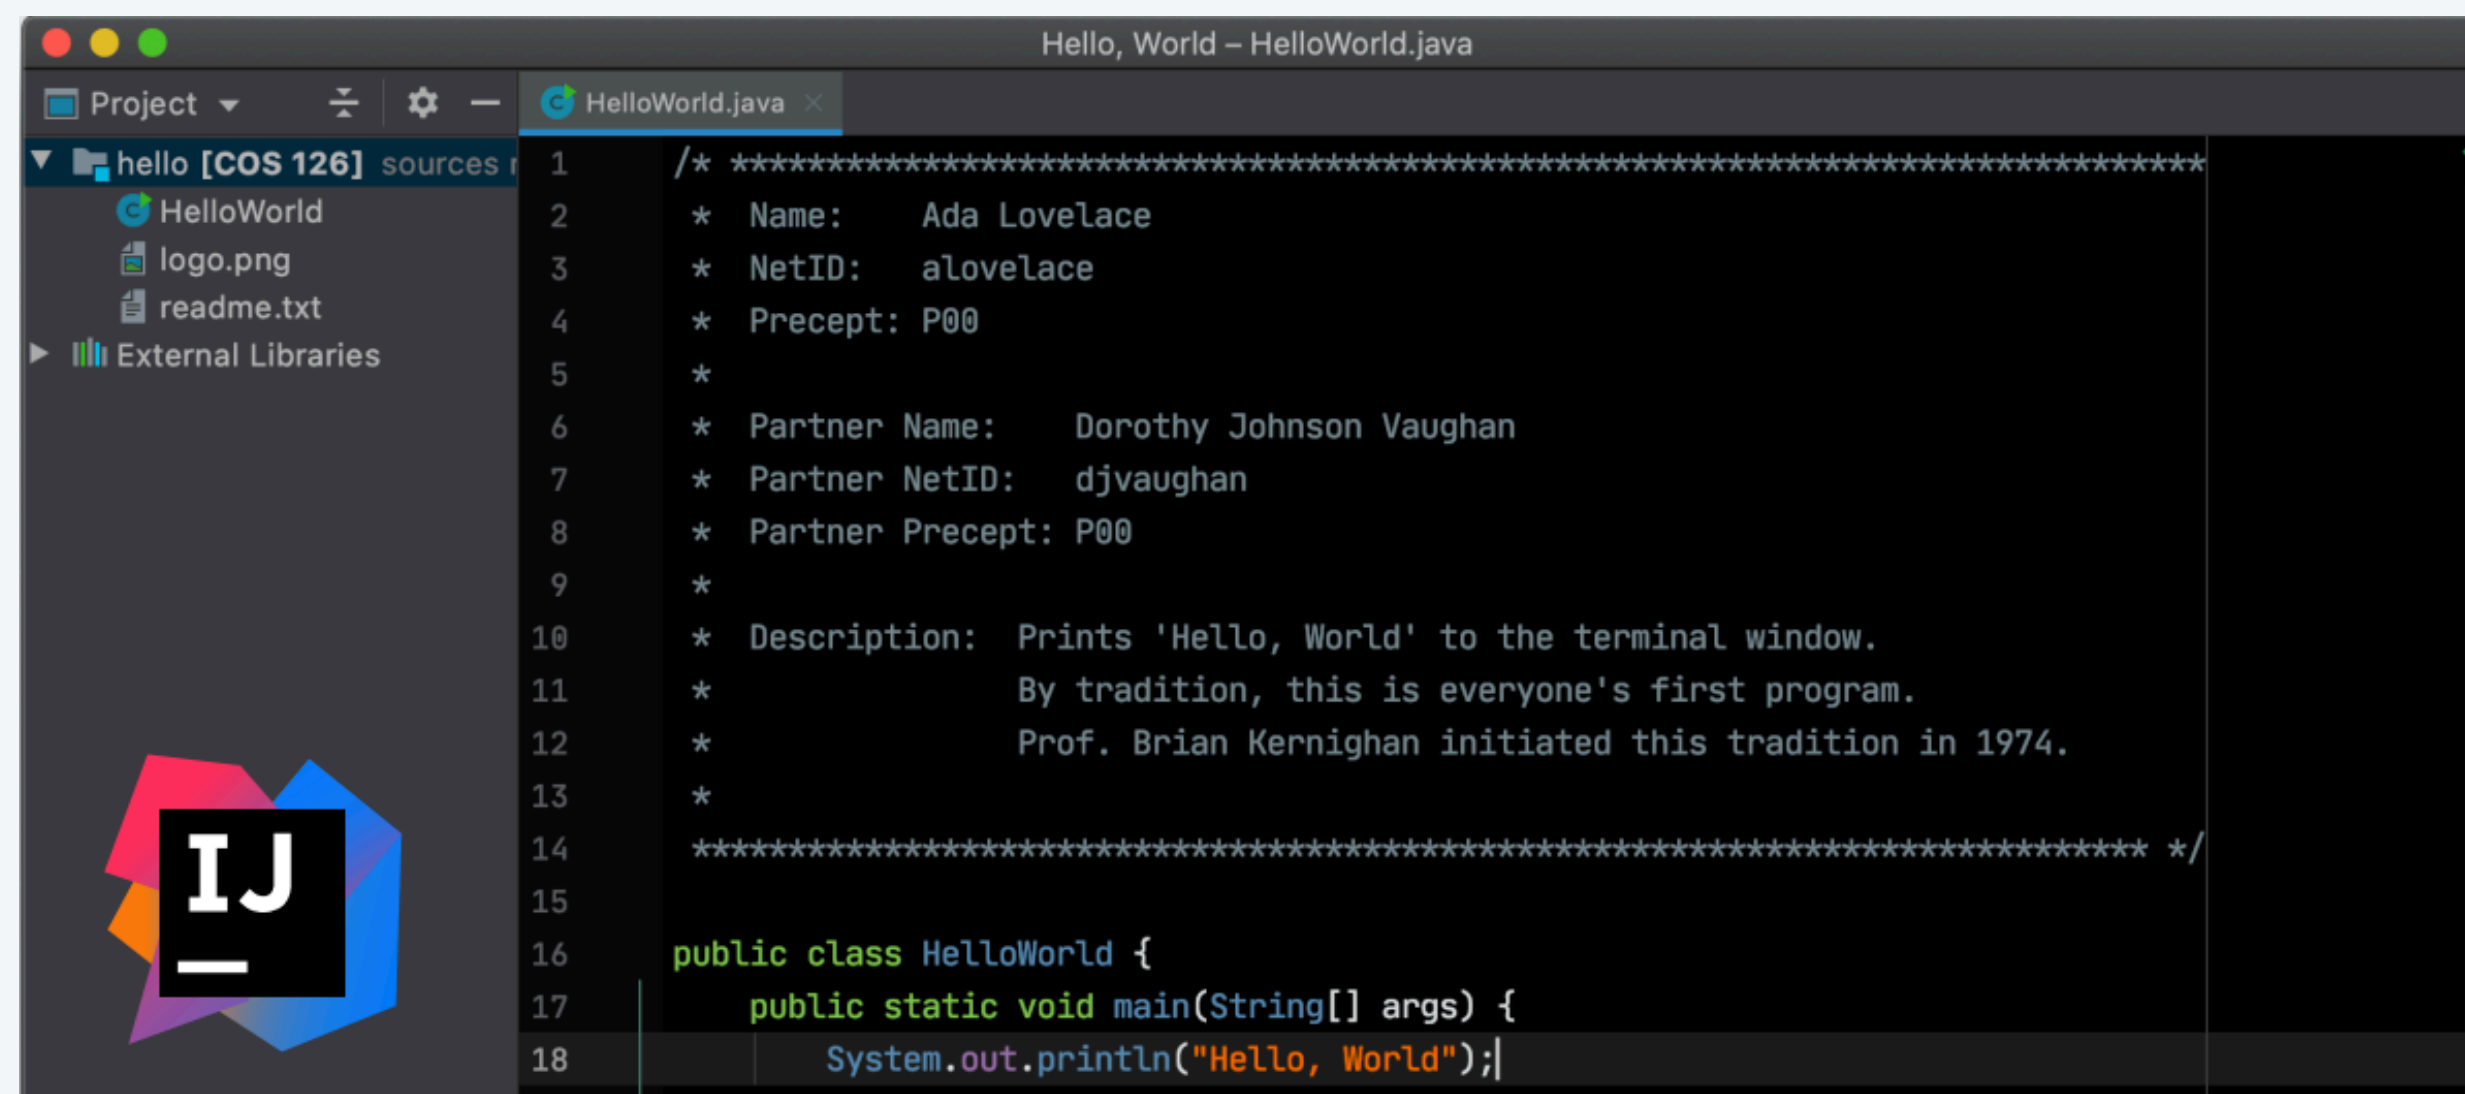

Marcel Dall'Agnol

Sebastian Caldas

Course elements

	Objective	When	Where	Who
Lectures	Introduce new material	MW 1:30–2:50pm		Marcel or Sebastian
Precepts	Active learning, discussions, problem solving	TTh 1:30–2:50pm		Marcel or Sebastian
Labs	Work on assignments with support from course staff	F 10:30am–1:00pm		Ammaar and Erik

```
1  /* *****  
2  * Name:   Ada Lovelace  
3  * NetID:  aLovelace  
4  * Precept: P00  
5  *  
6  * Partner Name:   Dorothy Johnson Vaughan  
7  * Partner NetID:  djvaughan  
8  * Partner Precept: P00  
9  *  
10 * Description: Prints 'Hello, World' to the terminal window.  
11 *               By tradition, this is everyone's first program.  
12 *               Prof. Brian Kernighan initiated this tradition in 1974.  
13 *  
14 * ***** */  
15  
16 public class HelloWorld {  
17     public static void main(String[] args) {  
18         System.out.println("Hello, World");  
19     }  
20 }
```

Quizzes	Practice the concepts discussed in class	Due on Fridays at 6pm	Website	You solve the problems on your own
Programming Assignments	Illustrate a programming or CS concept	Due on Sundays at 2pm	Website	You solve the problem from scratch, on your own computer

iClicker (required). To earn participation credit:

- ▶ Create iClicker Cloud account.
- ▶ Answer multiple choice questions during lecture.

<https://www.iclicker.com/>

Which dinosaur is cuter?

A. Barney

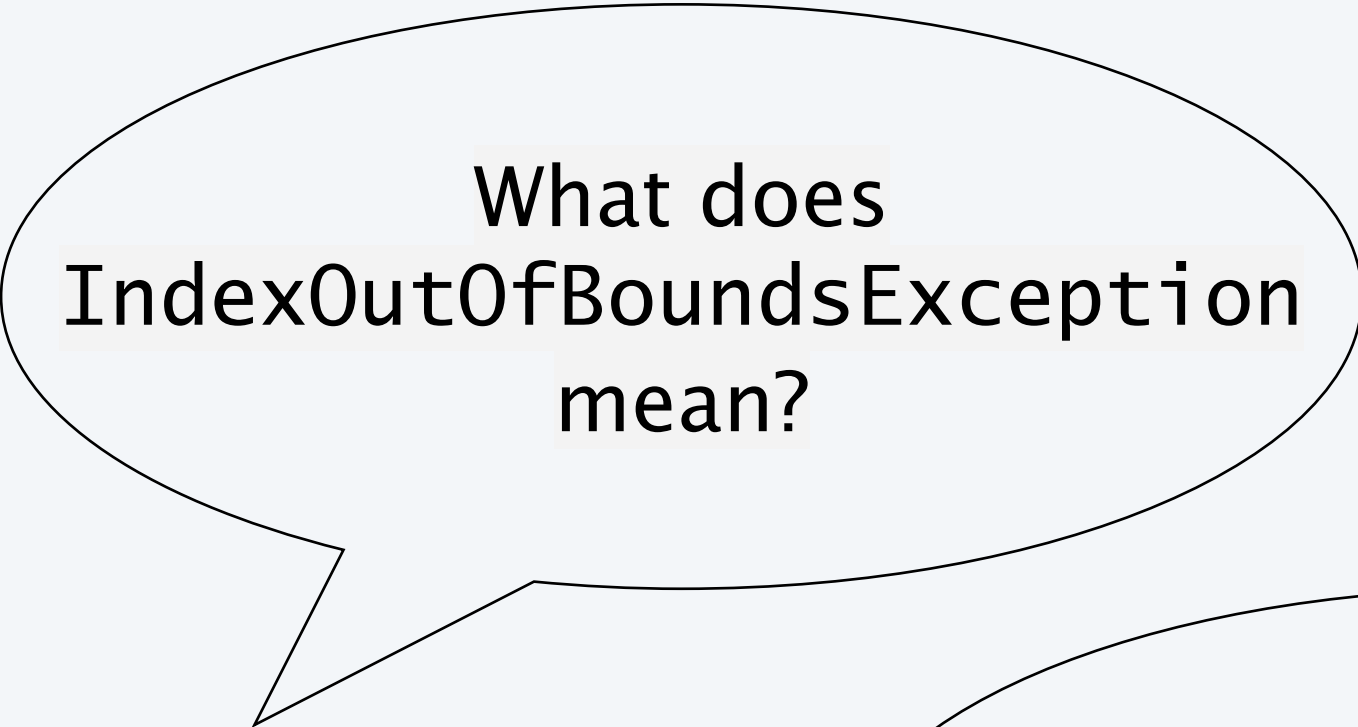

B. Ryan

Collaboration Policy

Executive Summary.

- ▶ **Do** discuss concepts with others.
- ▶ **Do** acknowledge any collaboration with others.
- ▶ **Do** partner with a classmate (when appropriate).
- ▶ **Do not** copy code from others.
- ▶ **Do not** share solutions to quiz questions.

What does
IndexOutOfBoundsException
mean?

How do I start the terminal in
IntelliJ?

Programming Assignment 4: Arrays

```
/*  
* Describe whatever help, if any, that you received on this assignment.  
* - Include help from people, including course staff, lab TAs,  
*   classmates, and friends. Attribute them by name and include the  
*   date(s) on which they helped you.  
* - Do not include course materials (such as the course textbook,  
*   lectures, and class meetings).  
* - Write "none" if you did not receive any help.  
* Here is an example:  
*  
*   9/16/22 Grace Hopper      (faculty)  
*   9/16/22 John von Neumann (course fellow)  
*/
```

[write the dates and help received here]

Grading

Programming Assignments (45%). Six of them, assigned weekly.

Quizzes (15%). Six of them, assigned weekly.

Final Exam (25%). Date TBD.

Participation (15%). Attendance (lectures and precepts).

A typical week (except this one)

Sun	Mon	Tue	Wed	Thu	Fri	Sat
30	1	2	3	4	5	6
7	Lecture 8	Precept 9	Lecture 10	Precept 11	Lab Quiz (due 6pm) 12	13
Assignment (due 2pm) 14	15	16	17	18	19	20

This week (a unique week)

Sun	Mon	Tue	Wed	Thu	Fri	Sat
30	1	2 Lecture	3 Precept	4 Precept	5 Lab Quiz (due 6pm)	6
7 Assignment (due 2pm)	8 Lecture	9 Precept	10 Lecture	11 Precept	12 Lab Quiz (due 6pm)	13
14 Assignment (due 2pm)	15	16	17	18	19	20
